

In order to provide greater levels of support to the refuelling industry we have now opened our dedicated **maintenance and repair facility**.

The 2-bay workshop can accommodate any size and type of refuelling vehicle and is fully equipped to carry out all types of service, maintenance and repairs.

- Fuelling package repair and maintenance
- Welding and fabrication, pipework, frames etc
- Tank repair
- Electrical, Hydraulic and pneumatic systems
- Chassis servicing and repairs.
- Paintwork

The facility offers capacity to cover emergency breakdown, repairs, scheduled maintenance as well as longer term overhaul and refurbishment programmes.
